## **Introduction**

LUIS dedicated himself to answer key questions regarding human behavior, culture, society, civilization, government, species survival, evolution and their potential development or upgrade.

His main interest is the development of technology that ensures human species survival and advancement, upgrade of human civilization, through a process in harmony with nature laws, rhythms and principles, which also involves personal development, self-knowledge and generation of wealth, heritage.

Care for peace, family, culture, life and heritage should be the natural outcome of the application of technologies created by the humanity. Any other outcome contradictory to human species survival should be adjusted back to life and nature principles.

There for LUIS have researched on technology that would help human individuals, families, communities, cultures, nations, organizations to in-prime: go back to the state of primal self awareness or intelligence, the awareness and empathy with nature harmony, with life, there for decision making and creations (including family, children education, culture, government, wealth, technology, research, and so on) will follow the same principles.

About LUIS time line, the following URL offers updated references and information:

### **BIO:**

Born in Peru, with family roots in Eurasia, China, Germanic, Nordic, Slavic countries, Spain, and Italy.

Has been living abroad traveling as an entrepreneur since 1996, with home bases in Peru, Chile, Switzerland, Germany, Finland and the Netherlands.

Background in IT and Science, Multidisciplinary professional development. Multi-talent.

Dedicated himself for 27 years to the creation of a management know how based on human factor and nature laws, rhythms and principles, he provides as consultant, coach and trainer.

Author, artist, meditation, yoga, and martial arts trainer.

Peace and human rights activist.

Futurist.

His vision is that all that humanity needs is love, consciousness, self-awareness, self-knowledge, personal development, wealth and self responsibility in order to reach a new golden age.

As well that a new species of corporation can be extremely beneficial for government, culture, peace, life-sustainability, family and human species survival.

## **AIMS**

### **SPIRITUAL AIMS**

The foundation of my spiritual teachings is that one of realizing the importance and engaging into self-knowledge and self-mastery. (Self-Knowledge)

### **BUSINESS AIMS**

I support as well a vision of a new kind of organizations, conscious and harmonious with nature and peace (Life-sustainers, heritage creators), that will replace the modern culture corporation (predators, life consumers). (Strategic Leadership)

### **CULTURE CARE AIMS**

I dare for an age of peace, harmony, self-responsibility where in daily life human rights are observed as well as life is cared and heritage is a matter of love, as each generation life is the legacy for the next ones to come. I support global citizenship, travel, culture and family as key for a world in peace. I create a model and suggestions for culture development, social self organization, nation administration and governance with new set of human rights and peace guidelines. (Peace Work)

### **FAMILY CARE AIMS**

A field human kind needs so much to care of, the corner stone of human life, and the field where all that humanity needs can be learned, discovered, achieved. (Love Family & Gender)

### **PLAY THE GAME**

Since 2015 Luis provokes human kind through the Game of the gods and the goddesses in prime self union, a role player game played on real life, type LARP, where individual or team missions are assigned online, and eventually training is also provided. (e-Game)

## **Academic Studies & Certificates**

### Science & I.T.

- 1991 - 1996 Foundation in science diploma ( Pontificia Universidad Catolica de Peru )
- 1981 - 1991 IT technical studies, Data base programmer ( Cybertech Technical University, Technical Institute of the University Catholic Peru, Private Software Programming Courses)

- 1996 - 1997 Namikoshi shiatsu, ( Japanese Culture Association, Peru )
- 1999 - 2012 Reiki master level IV, ( Teachers from Germany, Switzerland, France and Norway )

## **SELF-STUDY AND ITS IMPLICATIONS AS A DEVELOPMENT PATH**

The Bridge from Academic Studies into The Odin Theta Academy, Multidisciplinary Self-Study

Year 1997 i decided to dedicated my self to a research project i started in 1987. I realized i needed a multidisciplinary academic education, with focus on several fields of study. Such academic program did not exist, world wide, along the time my decision was made.

After 2 years search of alternatives in other countries, i decided to travel and dedicate my self to self education, in 18 fields of study necessary for the Primordial Technology know how i have developed since then.

In order to develop a new platform of knowledge i decided i must isolate all i know of previous western easter influences and find a new core set of principles, apply them and develop tools for a new culture, technology, civilization.

So i did, along 9 years i did “detox” from previous academic knowledge and explore in the essence of experience and natural rising of knowledge, as in the ancient greece, nordic and eastern schools of knowledge.

Since 2007 i started to write my e-books collection on Prime Culture & Prime Technology, Prime self Union.

(Since 1987) A Field of Knowledge, tools, applications, methods, based on nature principles, rhythms and laws which has direct impact in how humanity evolves, as it gives a new insight into human factor management, self-knowledge and personal development, there for for business, organization, governance, city, nation, culture management and possibilities of civilization upgrade.

The test proof continued until 2012. I provided services to small corporations, start ups, young entrepreneurs, social science professionals, natural science professionals, artists and military,

Since 2012 i have dedicated my self to the legacy project, at its first stage would mean to make the most important ideas, principles, questions and methods available to public through my own website, implement an internship program and ground a foundation and company dedicated to provide services based on it, develop new technologies, continue research and care for heritage generated based on it.

## **RESEARCH**

**Overview Presentation:** <https://vimeo.com/158717184>

Prime Tech  $\theta$  is a unique know-how that combines personal development training and business management skills, within the context of peace work (family, culture, life care and heritage).

### **What does Prime Tech $\theta$ mean ?**

Prime = Primordial, Natural, Original Technology

$\theta$  = 9, Perfection, Completion, Divine Nature.

Prime Tech  $\theta$  : The primordial technology of nature.

The human body is the result of the application of a very advanced technology, complex and simple in its nature, it is very sophisticated

The intelligence operating at the foundation of natural life, is capable of bringing to it the ability of self-organization, self-regulation, self-generation, self-sustainability based on collaboration and creation of multi-species living systems, with such a perfection, precision and harmony.

The self-sustainability and resilience skills of nature, in the human body and in eco-systems, is remarkable.

It is the perfection of the primordial technology, the technology of nature, the original technology of life, that Prime Tech  $\theta$  studies and applies, its laws, principles, the nature of its processes, rhythms, balance, strategy and intelligence.

### **Why do you need Prime Tech $\theta$ ?**

Modern culture have been designed and developed mostly by the use of concepts, concepts created intellectually with no relationship, awareness or inter-relationship (collaboration) with the principles that sustain life, or harmony in nature.

The result have been the development of a culture that destroys own environment, own people, itself, for own survival: a non sustainable pattern has been leading humanity development.

There is a need of a fundamental change in terms of how we think, perceive our world and life on earth, the responsibility we have regarding our own civilization, culture stage of development and its upgrade. Humanity has still the chance to change, to become self-responsible, to love itself: By deciding to change, by creating an heritage for new generations that is in tune with life and nature.

### **What do you do when you apply Prime Tech $\theta$ know how?**

You utilize nature, organic life, as a structure, reference, for your management: principles, rhythms, laws, organic process.

The tools used require from you to understand how life works, and the ability to apply that understanding to your business process, to your management intelligence.

Know how transfer takes place through training (learning by doing, becoming aware of yourself and of life, learning to perceive, by applying the nature and life principles, utilizing the methods, by engaging and developing skills)

### **What do you learn with Prime Tech $\theta$ ?**

Prime Tech  $\theta$  combines the following fields of knowledge and experience into learning activities and application projects. Along the learning process support through coaching and mentoring is provided.

## **Training Lessons**

1 Training Unit	=	45 min - 135 min.
1 Lesson	=	up to 3 training units.
1 Module	=	up to 9 lessons.
1 Workshop	=	1 to more modules.
1 Seminar	=	5 to 9 modules.
1 Weekend	=	9 modules
1 BootCamp	=	27 to more modules

A balanced learning experience will integrate emotional and body awareness, nature laws awareness, perception enhancement, technical instruction, self-management, self-knowledge, information, application practice, development of skills, knowledge, self-evaluation/control skills.

A lessons must bring by skills, knowledge, and make the student ready for tangible application. The learning process and method should focus into learning by experience, empower the student towards self-mastery and self-education.

## **One lesson may combine the following learning activities :**

Presentation  
Self-study  
Technical instruction  
Application ( Learning by doing )  
Case study  
e-Game (Learning by playing)  
Research  
Personal development  
Self-knowledge  
Nature Principles/Models application.  
Project development (application with real conditions)  
Assessment, self-assessment  
Register, archive, diary.  
Coaching, mentoring

## **Assessment**

Progress evaluation is based on the Prime Tech Standard, a matrix based system designed as a tool for analysis and evaluation of development stages result of the application of prime technology theta.

Each development line, a score line, suggest 9 development stages.

The combination of scores, reached at each score line, creates an overall perception of the development status of the student.

The well balanced development of skills and knowledge, technical capacity of application, perception, awareness, nature principles knowledge and self-knowledge is the goal of our learning programs.

Coaching and mentoring focus on enhancing the development process, supporting and advising the student on strategies and skills necessary for reaching the next milestone or development stage.

## **Gamification**

Learning by playing is one of the most modern and effective pedagogy approaches.

The Prime Tech Theta games include:

- Board Games - Strategy, analysis.
- L.A.R.P. Games - Life action role play games. Online or in daily life.
- Research Games - Assigned for quests online, abroad traveling or at location.
- Missions Game - Involve the application of individual, team skills.

Learning by playing has been integrated into every lesson and module.

It is also available one game to be played every week/season, a continuous playing platform where prime tech theta training programs, modules and lessons are provided and the knowledge and skills applied, through games.

## **GYM9s**

The goal of a GYM9 Training is to enhance, develop skills, transfer knowledge, through 9 minutes daily training.

GYM9s have been created for modern culture professionals, that need to give great value to time and day process.

In order to reach new milestones, new stages of personal development, self-knowledge, technical ability of applications of Prime Tech Theta methods, awareness of nature principles, one needs no more than 9 min. daily.

The GYM9s are designed according to students needs, can be personalized.

In general every lesson of Prime Tech Theta may include at least on GYM9 Training.

- Prime Tech Gamified, GYM9s, e-learning training method for Interns. (2015-2016)

## **Development**

LUIS created a series of tools, methods and practices, to be utilized for analysis, strategy, development and management.

The application of these tools creates also a continues learning process and increase of self-awareness and nature principles/laws awareness.

## **Application Fields**

LUIS practices enhance individual performance with a direct influence on quality of life in the fields of family, community, culture & life care and heritage, including business and government.

## **Conclusions**

LUIS body of work conclusions suggest human self-perception as one with nature, is key for the understanding on how collaboration with nature-active-principles within own life (body, relationships, community, species, culture, heritage) is extremely relevant for life and culture care as well as for heritage, despite individuals race, cultural background, lifestyle, gender, social status, religion; which will empower peace, respect of human rights and the development of a global culture.

## **Users Conditions**

This particular knowledge is possible to be applied by users that are dedicated to self-knowledge and personal development, to the practice of continues self-awareness, consciousness expansion, capable to utilize more than one perception possibility (parallel perception and parallel process management), as well as to use emotions and feelings for decision making.

The abilities described above can be developed, if not natural in individuals, through training, and only with individuals and communities consent, agreement, interest and self motivation.

## **Human Factor & Life Care/Sustainability**

The integration of self-love, love, in the practice of prime technology is key as for the individual ability to identify own interests and preferences. The ability “to listen to own heart and follow own bliss” as reference for perception of own preferences, choices and decision making need to be in harmony to human species mayor needs of survival, as for culture, life care and heritage; as well as for care of the planet and its species.

## **Abilities**

The human abilities of love, self-love, self-honesty, transparency, respect for each other, care, ability to listen and to communicate and self express, to naturally understand nature life cycles are key and necessary, foundation for the application of the primordial technology know how.

## **Development of Capacity & Skills**

The capacity and skills necessary for the study and application of prime technology (for business and organization management, community, family, self-management, as well as for sustainable development, culture and life care, heritage, peace and human rights), are developed through trainings and application, development of projects, self-study and self-experience: internship.

## **Method for self-study**

LUIS developed a method based on self-study, where individuals become responsible of own learning process. This method needs of cognitive, sensory and emotional experiences provided through practices, like dances, communication and interaction dynamics, creativity and improvisation, as well as from the application of systematic knowledge, principles and structures pre set as references for the learning process or application work. Mentoring, coaching and experiential trainings are given to students, as foundation necessary for their later self-study. ( learning by doing, learning by playing, direct and indirect learning modalities/strategies are applied along the training).

## **2015 Conclusion & Development Stage**

After many years of research, development of tools, application on the field, and providing services in the fields of business management, languages education, arts and self-awareness, preventive health practices, family and relationship, community building, arts and culture, peace and human rights; LUIS arrived to the conclusion that there is only on field where human life and its nature as “nature” can be directly experienced by any individual of any culture, race, language or religion, which is the field of conscious sexuality, where most of individual perception, emotional and sensory ability, honesty, transparency, self love, self respect, life care, love ability,... can be self-observed, mirrored, therefor perception and behavior patterns identified and by own choice transformed (through training or by will). Within the field of conscious sexuality (conscious love making and foreplay) individuals, couples, families, communities can learn from own experience and decide to enhance own “ability to love”.

There for a new series of trainings based on gender, family and love relationship, with impact in community, business, culture and government have been developed. Which can be only provided by couples, a love relationship, that apply this training for their own life, profession and business.

## **Development Stages, The Quantification of the Value**

The use of a set of references on personal development stages is necessary as for reaching a more enjoyable and fulfilling experience. LUIS coined several charts where key indicators, traits, that sign love-abilities and personal development, are described. Which make it possible to develop an assessment and score card, a standard and rank, which describe tangible abilities of application, there for capacity of the individual to engage into a precise function and responsibility. The Quantification of value tools can be utilized for self-knowledge, personal development, family/relationship, business, corporations, government, culture, civilization.

## **Benefits**

As simple as it is, the essential learning process associated to self-knowledge and personal development will bring a direct enhancement of individual daily life quality and professional life quality, with a direct benefit in community, state and culture. The application for business, family, culture, heritage and peace, are the main focus of the researcher.

## **Arts & Culture**

In order to suggest these learning activities described above, LUIS would like to create artistic expressions that reflect these quality of experiences. As well, he would like to bring by knowledge and skills to new trainers, coaches, and consultants. The arts trainings are designed towards this direction of the work.

## **Projects**

LUIS have designed strategy projects that would support students and users of primordial technology, as well as a learning program for interns, a private association of members dedicated to continues practice and several services and products dedicated to commercialization.

## **Foundation**

LUIS wishes his know how to be shared with future generations through a foundation that will care for continues research, education programs and application projects.

## **Arts**

Since 1992 facilitates workshops dedicated to personal development, emotional self-management, communication and collaboration.

Since 1992 Explores in multiple arts practice, play music, improvise poetry or story and paints.

In 2006 starts with the integration of all his artistic skills into body arts. Developed new body arts method, where self-awareness and emotional self-management will be applied as a preventive health practice, for body memory release and emotional self-balance, self-expression, and personal development. Invited by the world body painting festival academy, he will teach at the academy yearly since 2010.

In 2007 published several books dedicated to sustainable living, self-awareness, business management where self-education and emotional self-management is addressed. He created own education method, to be applied for adults and youth, based on learning through experiences ( a learning by doing ) and self-education.

Develops since 2013 Non violence practices, by applying meditative arts, meditation, yoga, and self defense (prime do). Dedicated to peace work since 2013. Facilitates workshops and provide arts performance, story telling, as for a call for peace.

In 2014 he launched a new project dedicated to peace based on his own method of performing arts improvisation, which focus on self-knowledge, personal development, self-transformation, self-mastery and meditation; with components of yoga, meditation, martial arts and performing arts improvisation methods.

In 2014 provided a training and audition to artists of more than 10 nationalities in Helsinki, with the purpose of building up an ensemble, crew, dedicated to peace work through performing arts. The ensemble will be trained in the art of peace trainings provided by LUIS, including non violence and emotional self-management methods. ( LUIS needed the residence and working permit in Finland 2015, in order to continue with this project. There for the project was placed on hold along whole 2015.)

## **Primordial Language & Culture**

Luis Daniel Maldonado Fonken teaches Prime Language and English simultaneously

Luis have been traveling for 18 years in Europe, South America & Russia. As a traveler, he knows the importance of communication skills and the need of practical languages training.

As a researcher of the Prime Culture, ( A primordial culture, mother-father of all cultures of earth/ human history; one of the non resolved questions of social science) he dedicated himself to learn several languages, and their pro to forms expressed within their grammar and sintaxis: Arabic, Russian, Japanese, Spanish, English, German, Suomi, Sanscrit and others.

Along his research he studied for several years on symbolic language, and prime language.

[www.prime-language.luisdanielmaldonadofonken.info](http://www.prime-language.luisdanielmaldonadofonken.info)

to discover the importance of the prime language for the research and study of the prime culture, neo-polytheism, and prime technology, as well as for the practice of prime yoga.

## **The Odin Theta Academy**

In 2014 Luis founded the Odin Theta Academy, a resemble of an ancient greek academy with the intention to provide teachings of Prime Technology to committed close circle of students.

The teachings will be provided in symbolic language, through symbolic story telling, will include studies of ancient cultures, the hypothetical prime culture/primordial culture, spiritual archeology, self-knowledge and personal development, as well studies of modern human culture and history and its relationship with the ancient cultures.

[www.odin-theta-academy.luisdanielmaldonadofonken.info](http://www.odin-theta-academy.luisdanielmaldonadofonken.info))

There for the study and practice of the prime language is of key importance.

The Odin Theta Academy will be also part of the Game of the Gods & The Goddesses in Prime Self Union, another Teaching project of LUIS dedicated to provide Prime Tech Trainings through ramification (done as well in prime language).

LUIS have several years experience on teaching languages and developing a languages education method, which is highly effective (9 lessons for communication skills, developed for 3 languages). With this background, several languages will be integrated into the teaching of prime language and symbolic language, by applying the 9 lessons method in the future.

Since 2011 Luis teaches only prime language and symbolic language, along training on english for example, as English is key for international communication and collaboration with students and team members that learn and apply prime technology.

Here the background and experience of LUIS as language teacher until 2011.

- 1998 -2016 Trainer: Personal development, self-knowledge and business management. (Peru, Chile, Switzerland, Germany, Austria, Belgium, Russia, Finland, The Netherlands)

**Personal Development & Self-Knowledge  
Coach, Trainer, Teacher**

**Prime Yoga**

[www.prime-yoga.luisdanielmaldonadofonken.info](http://www.prime-yoga.luisdanielmaldonadofonken.info)

**Personal development:**

<http://luisdanielmaldonadofonken.info/personal%20development%20theta/index.html>

**Spiritual Journey Coach, Spiritual Teacher.**

- LUIS Provides advice on the application of prime yoga, self-knowledge and personal development for daily life, love, family, community and business.
- Author, spiritual teachings goes public since 2007.
- Developed own meditation and yoga practice, as well as meditative arts and martial arts (prime arts and prime do) since 1997, inspired by conscious dreaming states he experiences since 3 years old. [www.prime-do.luisdanielmaldonadofonken.info](http://www.prime-do.luisdanielmaldonadofonken.info) [www.prime-arts.luisdanielmaldonadofonken.info](http://www.prime-arts.luisdanielmaldonadofonken.info) [www.prime-love.luisdanielmaldonadofonken.info](http://www.prime-love.luisdanielmaldonadofonken.info) [www.prime-peace.luisdanielmaldonadofonken.info](http://www.prime-peace.luisdanielmaldonadofonken.info)
- Teaches Meditation and Yoga, in its several forms, since 1987. His first meditation training gave at young age, by suggesting boy scouts practices on body self awareness. Later will organize a self-development circle at university for his fellow companions, and facilitate there games, experiences and practices that suggest meditative states developed through self-awareness, emotional self-management, team and community building work
- Received transmissions and empowerments for the development and application of his methods in dreams and meditative states he entered by applying own methods and practices.
- He dedicates himself since 1987 to bring to daily life the states of consciousness experienced in dreams, for which develop practices, applications, trainings, methods, and description of his own knowledge.
- Since 1987/97, after a natural kundalini awakening and consciousness implosion, did search for teachings in available in the current time that had similarity or resonance to the knowledge and states of consciousness he experienced.
- He visited for another 9 years, different spiritual traditions and trainers, and discovered similarities but as well lack of consistency, error in application format and adaptation of teachings for current time, and lack of congruency with the needs of our time in terms of collective global consciousness; when perceived from the point of view of his own experiences and own knowledge. He shared own point of view, approach and solutions with all teachers and trainers he visited. In 2007 he decide to share his own teaching for public, dedicated to write own books, share teachings online and dedicated to public teaching and development of projects by applying his own knowledge.
- With a practical and natural life based approach he supports individual self-development, family and community. He suggests mastery on the earth element (wealth) as foundation for a joyful life.
- Along his teachings he point out the difference between conceptual spirituality and organic experience of spiritual knowledge applied, tangible spirituality on daily life.
- He also suggests is possible to apply meditation and nature principles for business. [www.prime-tech9.luisdanielmaldonadofonken.info](http://www.prime-tech9.luisdanielmaldonadofonken.info)
